The Big Five Personality F	actors – Humans
----------------------------	-----------------

	High scores are	Low scores are
Extroversion	Outgoing, enthusiastic and active	Aloof, quiet and cautious
Agreeable	Trusting, empathetic and compliant	Uncooperative and hostile
Openness	Creative, imaginative and eccentric	Practical, sceptical and conventional
Conscientiousness	Organised, self directed and controlling	Spontaneous and careless
Neuroticism	Prone to stress, worry and negativity.	Emotionally stable but will take risks.

Four Personality Factors - Common Squirrel Monkeys

	High scores are	Low scores are
Impulsiveness	Excitable, curious and playful	Predictable, calm, undisturbed
Agreeable	Gentle, affectionate, sympathetic	Bullying, jealous
Assertive	Dominant, independent and decisive	Submissive, timid, and fearful
Neuroticism	Anxious, clumsy, haphazard in behaviours	Calm, relaxed

V. Tomkins-Horn picture arrangement test:

This test is designed for group administration. It consists of some objects that may be arranged in different ways to portray sequence of events. The respondent is asked to arrange them in a sequence which he considers as reasonable. The responses are interpreted as providing evidence confirming certain norms, respondent's attitudes, etc.

Put the following in the correct order

QUESTIONS ?????

THANK YOU VERY MUCH
